

Relax...

with the new Smartstream

The new Smartstream is the fuss-free way to cool samples to 170K without liquid nitrogen. This simple system combines a smart mini cooler with a dry air unit to give:

- 170-400K dry gas stream
- No liquid nitrogen or cooling water required
- Low cost of ownership
- Virtually no maintenance
- Fits on all diffractometers including benchtop systems

Just one more Oxford Cryosystems innovation to leave you feeling...

chilled out.
